We can run inline R code  $2^{10} = 1024$

In RMarkdown we can use markdown syntax, such as unordered list items

- ▶ item
- ▶ item
  - ▶ more item

Or use block quotes are written after `>`, e.g.,

*To be, or not to be, that is the question!*

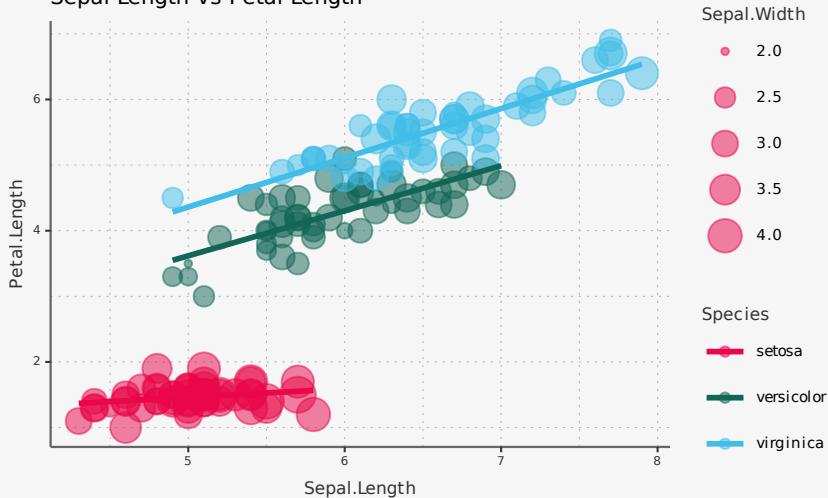

We can easily write math expressions by latex syntax. Inline LaTeX equations can be written in a pair of dollar signs

$$f(k) = \binom{n}{k} p^k (1 - p)^{n-k}$$
